SUMMARY

Information Systems student at Brigham Young University with experience building AI-driven tools, full-stack applications, and workflow automations. Hands-on experience with Python, LLM APIs, React, and product-oriented software development, with a strong interest in creating practical digital experiences.

EDUCATION

Bachelor of Science, Information Systems

Brigham Young University - Marriott School of Business

Est. Apr 2028

Provo, UT

SKILLS

- Programming: Python, SQL, Java, C++, JavaScript, HTML/CSS.
- AI/Automation: LLM/API Integrations, Claude Code, Agents, Workflow Automations

PROJECTS

Ledger Personal Finance Tracker | React, Express, SQLite

- Built a full-stack expense tracker with auto-categorization, budget tracking, safe-to-spend calculation, and natural quick add input.
- Designed a fast, user-friendly workflow for everyday personal finance tracking.

Daily AI News Digest Agent | Python, automation

- Built an automated weekday agent that pulls stories from multiple AI news sources, then filters and ranks them into a concise overview.
- Standardized source ingestion and prioritization workflows for business use.

Local Sleep Briefing Agent | Python, Claude API

- Generated daily recommendations connecting sleep quality to planned workload and habits.
- Surface daily recommendations that tie sleep quality to planned workload and habits.

EXPERIENCE

IT Specialist

BYU J. Reuben Clark Law School

Aug 2025 – Present

Provo, UT

- Supported 500+ law school affiliates across hardware, software, and network issues while improving troubleshooting consistency through clear workflow documentation.
- Deployed and managed Malwarebytes through ThreatDown to strengthen endpoint security across the device fleet.
- Managed a high-volume Jira ticket queue and documented repeatable support processes, reducing repetitive troubleshooting by 60%.

Volunteer Representative

The Church of Jesus Christ of Latter-day Saints

Jun 2023 – Jun 2025

Lubbock, TX

- Implemented and documented a mission-wide training framework that improved trainer effectiveness and consistency.
- Coordinated disaster cleanup and food distribution efforts, facilitating aid for thousands in relief operations.
